DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121
 - A. Claims 1-43 are drawn to a method for detecting a selected drug in a biological sample comprising specific antibodies and identifying a source of the biological sample via an antibody-enzyme conjugate, classified in class 435, subclass 7.1 for example.
 - B. Claims 44-60 are drawn to method for analyzing biological materials comprising individual specific antibodies, classified in class 435, subclass 7.9 for example.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions A and B are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have distinct modes of operation. The method of invention A requires an antibody-enzyme conjugate (claim 1) as well as primary and secondary antibodies (claim 43) to not only detect a selected drug, but also identify the source of the biological sample. The method of invention B merely analyzes a biological sample by covalent bounding (claim 45) of formed immune complexes. No antibody-enzyme conjugate is required in the method of invention B. Accordingly the method of invention B is not limited to only antibody-enzyme conjugate reagents.

Page 3

It is recognized that although the search for the inventions may overlap they are not totally coextensive, where the search for one would fully encompass the search for the others. Because these inventions are distinct for the reasons given above and the search required for Inventions A-B are not mutually inclusive (i.e. the search for one invention is not required for the other inventions) restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Please note that the classifications in the restriction are illustrative only and **do not** represent all the classes and subclasses which must be searched for each invention; nor is the search limited to issued US patents, but rather includes foreign patents and applications as well as literature searches.

ELECTION OF SPECIES

4. This application contains claims directed to the following patentably distinct species of the claimed invention: The invention of Groups A and B include a plurality of disclosed patentably distinct inventions (various drugs, biological sample types, multiple antigens, solid supports, enzymes). Therefore, each disclosed patentably distinct component or embodiment is considered a separate invention.

Application/Control Number: 10/017,577

Art Unit: 1641

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits by selecting a single distinct embodiment I-V to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 43-53, and 60 are generic.

As to invention A above: one of the following claims must be selected in each group:

- I. With respect to the "selected drug" either one of claims 2-8 must be elected.
- II. With respect to the "biological sample" either one of claims 10-21 must be elected.
- III. With respect to the "multiple antigens" either one of claims 22-25 must be elected.
- IV. With respect to the "solid support" either one of claims 26-29, 35, or 40 must be elected. If claim 29 is selected either one of claims 30-34 must also be elected. If claim 35 is selected either one of claims 36-39 must also be elected.
 - V. With respect to the "enzyme" either one of claims 41-42 must be elected.

As to invention B above: one of the following claims must be selected in each group:

- VI. With respect to the "selected drug" either one of claims 55-59 must be elected.
- 6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Application/Control Number: 10/017,577 Page 5

Art Unit: 1641

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

- 8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
- 10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO fax center located in Crystal Mall 1. The faxing of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Group 1641 Fax number is (703) 872-9306, which is able to receive transmissions 24 hours/day, 7 days/week.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lisa V. Cook whose telephone number is (571) 272-0816. The examiner can normally be reached on Monday - Friday from 7:00 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le, can be reached on (571) 272-0823.

Any inquiry of a general nature or relating to the status of this application should be directed to Group TC 1600whose telephone number is (571) 272-1600.
